1. This action is in response to the application that was received on January 5, 2004. Claims 1-19 are pending. The drawings received on 1/5/04 have been approved by the examiner.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art references describe receiving data by transmitting the data through input data buffers that include shift register and FIFO buffers and describe serial to parallel conversion of data (see figure 9 of patents 6,055,590 and 5,822,571). None of the cited references describe the claimed synchronized control and timing signals or the claimed control signal generation circuit.

The claimed invention is allowable over the art of record because the art of record does not teach or suggest a method or apparatus for transmitting data comprising the recited combination of interrelated circuit elements including the control signal generation circuit, the write state machine, the read state machine, the conversion circuit and the selection circuit or the combination of interrelated and synchronized control and timing signals as claimed in independent claims 1, 6, 8, 12, 15 and 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis M. Butler whose telephone number is 571-272-
